WE CLAIM:

- 1. A process for producing a deformed image comprising the steps of: digitally exposing a colour photographic silver halide

 5 material, said colour photographic silver halide material comprising on a deformable plastic support at least one bluesensitive silver halide emulsion layer containing at least one yellow coupler, at least one green-sensitive silver halide emulsion layer containing at least one magenta coupler and at least one red-sensitive silver halide emulsion layer containing at least one cyan coupler; conventionally processing said exposed colour photographic material to produce an image; and deforming said colour photographic material.
- 15 2. Process according to claim 1, wherein the silver halide emulsions have an overall silver chloride content of at least 70 mol%.
- 3. Process according to claim 2, wherein the silver halide 20 emulsions have an overall silver chloride content of at least 98 mol%.
- 4. Process according to claim 1, wherein the silver halide crystals of at least one silver halide emulsion are structured crystals with a silver chloride content of at least 70 mol% and with at least two different zones, the outermost zone having a higher molar content of silverbromide than the rest of the crystal.
- 5. Process according to claim 1, wherein said support is provided
 with a subbing layer comprising 1.3 to 80% by weight of a
 proteinaceous colloid, 0 to 85% by weight of colloidal silica
 and 0 to 30% by weight of a siloxane, which can form a reaction
 product with said colloidal silica.
- 35 6. Process according to claim 5, wherein said subbing layer is provided on the same side of said support as the silver halide emulsion layers.
- 7. Process according to claim 1, wherein said green-sensitive 40 silver halide emulsion layer and/or said red-sensitive silver halide emulsion layer contain a silver halide emulsion with

15

silver halide crystals having an average grain size of at least 0.4 μm_{\cdot}

- 8. Process according to claim 1, wherein said silver halide emulsion layers contain one or more binders.
 - 9. Process according to claim 8, wherein said binders in said silver halide emulsion layers is at least 80% by weight gelatin.
- 10 10. Process according to claim 1, wherein said colour photographic material contains at least one light-sensitive layer containing a compound represented by formula (XII):

$$R^{52}$$
 $N = N$
 $N =$

in which R^{52} represents H, CH_3 or OCH_3 ; R^{53} represents H, OH, CH_3 , OCH_3 , $NHCO-R^{54}$, $COOR^{54}$, SO_2NH_2 , $NHCONH_2$ or $NHCONH-CH_3$; and R^{54} represents $C_1-C_4-Alkyl$.

20 11. Process according to claim 1, wherein said blue-sensitive silver halide emulsion layer contains a blue sensitizer represented by formula (IX):

$$R^{31}$$
 R^{32}
 R^{33}
 R^{34}
 R^{37}
 R^{38}
 R^{38}
 R^{34}
 R^{34}
 R^{35}
 R^{37}
 R^{38}
 R^{38}

wherein X¹ and X² independently represent S or Se, R³¹ to R³⁶ independently represent hydrogen, halogen or an alkyl-, alkoxy, aryl or hetero-aryl group or R³¹ and R³²; R³² and R³³; R³⁴ and R³⁵; R³⁵ and R³⁶ together represent the atoms necessary to form an anellated benzo-, naphtho- or heterocyclic ring, R³⁷ and R³⁸ independently represent an alkyl-, sulfoalkyl-, carboxyalkyl,- (CH₂)₁SO₂R³⁹SO₂-alkyl, -(CH₂)₁SO₂R³⁹CO-alkyl, -(CH₂)₁COR³⁹SO₂-alkyl or -(CH₂)₁-COR³⁹CO-alkyl group, R³⁹ represents -N⁻- or

10

- -NH-, l is a whole number between 1 and 6 and M is an optional counter-ion providing charge compensation.
- 12. Process according to claim 1, wherein said deformable plastic support is a polycarbonate, poly(vinylchloride), vinylchloride copolymer or a polyester; or a copolyester based on PET.
 - 13. Process according to claim 1, wherein said process further comprises the step of laminating the outermost layer on the image side of said colour photographic material with a protective foil.
- 14. Process according to claim 1, wherein said deforming step comprises deforming said colour photographic material in contact with a work piece.
 - 15. Process according to claim 13, wherein said protective foil is provided before deforming said colour photographic material with a work piece.
 - 16. Process according to claim 1, wherein said deforming step comprises deforming said colour photographic material by vacuum deformation.
- 25 17. Process according to claim 1, wherein said deforming step comprises deforming said colour photographic material by injection moulding.
